

# Signs and Symptoms of Abuse

**Recognizing these warning signs of elder abuse can be a very effective tool in early intervention and prevention of further abuse.**

<b>PHYSICAL ABUSE</b>	<ul style="list-style-type: none"><li>• Unexplained signs of injury such as bruises, welts, or scars, especially if they appear symmetrically on two sides of the body</li><li>• Broken bones, sprains, or dislocations</li><li>• Report of drug overdose or apparent failure to take medication regularly (a prescription has more remaining than it should)</li><li>• Broken eyeglasses or frames</li><li>• Signs of being restrained, such as rope marks on wrists</li><li>• Caregiver's refusal to allow the elder to be seen alone</li></ul>
<b>EMOTIONAL ABUSE</b>	<p><b>In addition to the general signs above, indications of emotional elder abuse include</b></p> <ul style="list-style-type: none"><li>• Threatening, belittling, or controlling caregiver behavior that is witnessed</li><li>• Behavior from the elder that mimics dementia, such as rocking, sucking, or mumbling to oneself</li></ul>
<b>SEXUAL ABUSE</b>	<ul style="list-style-type: none"><li>• Bruises around breasts or genitals</li><li>• Unexplained venereal disease or genital infections</li><li>• Unexplained vaginal or anal bleeding</li><li>• Torn, stained, or bloody underclothing</li></ul>

## CARE RESPONSE

Providing in-home health care
